***Specification***

1. The abstract of the disclosure is objected to because the abstract is more than one (1) paragraph in length. The current Abstract should be replaced with an Abstract that is one paragraph in length. Correction is required. See MPEP § 608.01(b).
2. The amendment filed 4 November 2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The elements in added Figure 4. Furthermore, the specification cannot be amended to enter the description of Figure 4, since it would constitute new matter that was not originally disclosed in the application. Figure 4 cannot be entered as a new figure, since the new figure also constitutes new matter.

Applicant is required to cancel the new matter in the reply to this Office Action.

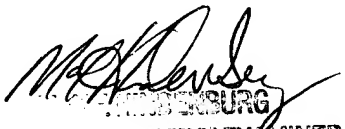

***Allowable Subject Matter***

3. The following is a statement of reasons for the indication of allowable subject matter: Claim 1 was found to contain allowable subject matter, since no prior art could be found teaching or suggesting a compressible sharp piercing tip fixed to the end of a probe through a coiled wire. Claims 1-3 will be allowable once the above objections are overcome, and Claims 4-6, which were added in the amendment on 28 February 2003 are cancelled.
